Nghĩa Nguyễn Đình

Engineering Manager

0969228100 nghiand1010@gmail.com https://viblo.asia/u/nghiand1010 Hanoi

OBJECTIVE

Engineering leader with 10+ years of experience driving enterprise-scale software development and data platform architecture (ERP, CRM, CDP). Proven success in building and scaling cross-functional teams, delivering mission-critical systems, and enabling data-driven decision-making at scale.

EDUCATION

Hanoi University of Science and Technology 2007 - 2012

Applications of Mathematics and Informatics

Data Structure and Algorithms, Operating System, Networking, Computer Architecture, Programming Language, Mathematics

WORK EXPERIENCE

MISA JSC 2023 - Present

Engineering Manager

Managed the Data Team responsible for large-scale data infrastructure and advanced analytics to drive strategic decisions across the company:

- Designed and operated ETL pipelines for **40+ systems**, integrating high-volume data from diverse internal and external sources.
- Built a **data lakehouse** to unify and model customer data, creating detailed profiles for **over 2 million enterprise clients**.
- Analyzed user behavior and deployed **AI/ML models** to identify high-potential customers and forecast churn risk across **billions of records annually**.
- Delivered real-time and periodic reports to the executive board and company-wide stakeholders, covering **subscriber trends**, **product engagement**, and **churn metrics**.
- Developed and automated **financial and operational dashboards**, including **revenue**, **aging debt**, and **business performance KPIs**.

Tech stack: SQL Server, MySQL, PostgreSQL, MongoDB, Clickhouse, Elasticsearch, Data Pipelines, CDC, Docker, Lakehouse Architecture

MISA JSC 2020 - 2023

Principal Solution Architect / Principal Database Engineer

- **Designed and developed** a high-performance **e-invoicing system** capable of processing **over 1 million records daily**, leveraging **C4 model**, **.NET Core**, **Kafka**, **MySQL**, and **MongoDB**.
- Led the architecture and development of a comprehensive **ERP system** serving **20,000+ enterprise clients**, including complex modules such as **Accounting**, **HRM**, **CRM**, and **Business Process Management**.
- **Diagnosed and resolved intermittent issues** across multiple enterprise applications—including E-Invoice, Task Management System, AI Marketing Platform, and Asset Management System—resulting in **increased system stability** and **performance improvements ranging from 5x to 100x**.
- Actively contributed to drafting and standardizing company-wide procedures, design guidelines, and operational regulations for database architecture, implementation, and administration, ensuring consistency and best practices across all data-related projects.
- **Tech stack:** .NET Core, Kafka, SQL Server, MongoDB, MySQL, Redis, Elasticsearch, Docker, Kubernetes.

MISA JSC 2018 - 2019

Project Manager

- **Managed and led** a cross-functional team of **30 Developers**, **5 Business Analysts**, **3 Software Architects**, and **5 QA Engineers** to deliver the company's **flagship CRM system**.

- Developed a scalable CRM platform serving **millions of enterprise customers**, supporting the daily operations of over **2,000 sales staff** and **executive management**.
- Directed complex **data migration** from the legacy system to the new platform, successfully migrating **tables with over 2 million records** while ensuring data accuracy and zero business disruption.
- Delivered a mission-critical solution that centralized customer data, streamlined sales workflows, and enabled real-time reporting for strategic decision-making.

Tech stack: .NET Core, Kafka, SQL Server, Redis, Elasticsearch, Angular, Docker, Kubernetes.

FPT Software 2012 - 2017

Developer

- Developed an Outlook add-in and designed a relational database to manage contact data for a Japanese electric company (65,000+ organizations).
- Built an Email Management System with role-based access control, Exchange Server integration, and custom filtering logic.
- Collaborated with Japanese clients to deliver software specifications and system designs.
- **Tech stack:** C#, .NET Framework, SQL Server, Windows Forms, WPF, Exchange Server, Web Forms

SKILLS

Programming languages	C#, VB.Net, JavaScript, Python, SQL
Databases	SQLServer, MySQL, PostgreSQL, MongoDB, Clickhouse, Elasticsearch
Technology	Microservices, REST APIs, Data Pipelines, CDC, Lakehouse Architecture,
Monitoring & DevOps	Prometheus, Grafana, Jenkin, Docker, K8s

HONORS & AWARDS

- **Editor choice - Viblo Jan -2023** 2023

CERTIFICATIONS

Fundamentals of Engineering Certification (IPA)	2013
NEXT-GEN CTO PROGRAM 2023 - 2024	2023
System Design Expert	2023
Machine Learning Expert	2024
