

NGUYEN DINH NGHIA

Engineering Manager | Senior Software Architect

(+84) 969 228 100 | ✉ nghiand1010@gmail.com | linkedin.com/in/nghiand | Hanoi, Vietnam

BRIEF INTRODUCTION

Engineering Manager with 10+ years of experience building scalable ERP, CRM, and Data platforms serving millions of users. Expert in Data Engineering (20TB+ lakehouse), System Architecture, and leading cross-functional teams to deliver high-impact business solutions.

SKILLS

Languages: Vietnamese, English

Architecture & Design: Microservices, Event-Driven Architecture (EDA), System Design (C4 Model), API Gateway, Multi-tenancy, Master Data Management (MDM)

Data Engineering: Data Lakehouse (Hadoop, Spark, Hudi, Presto), ETL Pipelines, CDC, ClickHouse

Backend Development: .NET Core/C#, Python, SQL, JavaScript

Databases: SQL Server (Expert in Performance Tuning), PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

DevOps & Observability: Docker, Kubernetes, Kafka, RabbitMQ, Airflow, Prometheus, Grafana, OpenTelemetry

WORK EXPERIENCE

Engineering Manager (Data Team) | MISA JSC

Jun 2023 - Present

Outline:

Managed a team of 8+ engineers responsible for data infrastructure and analytics driving strategic decisions company-wide.

Key Responsibilities:

- Designed and implemented a Data Lakehouse architecture (Hadoop, Hudi, Presto) managing over 20TB of raw data
- Leveraged ClickHouse to reduce complex report generation time by 80%
- Architected robust ETL pipelines for automated data ingestion from 50+ disparate sources
- Deployed AI/ML predictive models for churn risk and customer potential ranking for 2M+ enterprise clients
- Led data team to deliver business intelligence solutions for enterprise decision-making
- Administered and monitored the performance and availability of all company databases

Technology: Python, C#/.NET Core, Hadoop, Spark, Hudi, Presto, ClickHouse, Kafka, PostgreSQL, Kubernetes, Airflow

Key Achievements: - Reduced query time by 80% using ClickHouse optimization - Integrated 50+ data sources into unified platform serving 2M+ enterprise clients - Enabled data-driven decision-making for C-level executives through automated dashboards

Principal Solution Architect / Database Expert | MISA JSC

Jan 2020 - May 2023

Outline:

Built company-wide architecture standards and mentored database experts across all product lines.

Key Responsibilities:

- Re-architected the E-invoice application to handle a scale of 1,000,000 invoices per day
- Led the architecture and development of a comprehensive ERP system serving 100,000+ enterprise clients
- Successfully improved HRM report performance from 10 seconds to less than 1 second
- Authored company-wide guidelines for database architecture, implementation, and administration
- Provided technical leadership across multiple product lines
- Mentored development teams on best practices for high-performance database design

Technology: C#/.NET Core, Python, SQL Server, PostgreSQL, MongoDB, Kafka, Kubernetes, Redis, Elasticsearch

Key Achievements: - Scaled e-invoicing system from 100K to 1M invoices/day (10x improvement) - Optimized HRM reports from 10s to <1s response time - Established database standards adopted across 40+ applications

Project Manager / Tech Lead | MISA JSC

Oct 2018 - Dec 2021

Outline:

Led 50+ member team delivering flagship ERP/CRM platform serving 100K+ enterprise customers and 2,000+ sales staff.

Key Responsibilities:

- Managed a flagship ERP platform integrating 40+ applications for 100K+ enterprise customers
- Led a cross-functional team of 50+ members to deliver a scalable CRM supporting 2,000+ sales staff
- Directed the migration of 2M+ records from legacy systems with zero business disruption
- Coordinated with stakeholders to align technical solutions with business objectives
- Delivered multiple high-impact projects on time and within budget

Technology: C#/.NET Core, MySQL, Kafka, RabbitMQ, Elasticsearch, Kubernetes, Angular

Key Achievements: - Delivered flagship CRM serving 2,000+ sales staff with zero data loss during migration - Became company's most successful product, managing 2M+ customer records

Software Developer | FPT SOFTWARE

Jun 2012 - Jan 2017

Outline:

Developed mission-critical systems for Japanese utility companies (65,000+ organizations).

Key Responsibilities:

- Developed mission-critical systems for major Japanese utility companies
- Built an Outlook add-in and designed a relational database to manage complex contact data
- Developed Email Management System with role-based access control and Exchange Server integration
- Specialized in SQL Server performance tuning and complex problems like authentication and email filter rules
- Collaborated with Japanese clients to deliver software specifications and system designs

Technology: C#, .NET Framework, SQL Server, Windows Forms, WPF, Exchange Server, Web Forms

Key Achievements: - Delivered enterprise systems with 99.9% uptime for 65,000+ organizations

EDUCATION

Hanoi University of Science and Technology | Oct 2007 - May 2012

Major: Applied Mathematics and Informatics

CERTIFICATIONS

- **MLExpert (Machine Learning)** - AlgoExpert - 2024
 - **SystemsExpert (System Design)** - AlgoExpert - 2023
 - **Next-Gen CTO Program** - 2023
 - **Fundamentals of Engineering Certification** - IPA Japan - 2013
-

HONORS & RECOGNITION

Editor's Choice - Viblo (January 2023)
Awarded for outstanding technical contributions to the developer community

LEADERSHIP & SOFT SKILLS

- Managed cross-functional teams of 50+ members across multiple product lines
 - Expert in stakeholder management and aligning technical solutions with business objectives for C-level executives
 - Active mentor for junior developers and architects in system design and data engineering
-

Building scalable systems with a mathematician's mindset.
