

Nghia Nguyen Dinh

Engineering Manager

0969228100 | ✉ nghiand1010@gmail.com | [linkedin.com/in/nghiand](https://www.linkedin.com/in/nghiand) | github.com/nghiand1010 | viblo.asia/u/nghiand1010
| Hanoi, Vietnam

OBJECTIVE

Engineering leader with 10+ years of experience driving enterprise-scale software development and data platform architecture (ERP, CRM, CDP). Proven success in building and scaling cross-functional teams, delivering mission-critical systems, and enabling data-driven decision-making at scale.

EDUCATION

Hanoi University of Science and Technology | 2007 - 2012

Bachelor of Applied Mathematics and Informatics

Core Coursework: Data Structures & Algorithms, Operating Systems, Networking, Computer Architecture, Programming Languages, Mathematics

WORK EXPERIENCE

MISA JSC | Engineering Manager | 2023 - Present

Managed the Data Team responsible for large-scale data infrastructure and advanced analytics to drive strategic decisions across the company:

- Designed and operated ETL pipelines for 50+ systems, integrating high-volume data from diverse internal and external sources
- Built a data lakehouse managing 20TB+ of data to unify and model customer data, creating detailed profiles for over 2 million enterprise clients
- Analyzed user behavior and deployed AI/ML models to identify high-potential customers and forecast churn risk across billions of records annually
- Architected and implemented Event-Driven Architecture (EDA) with distributed tracing using OpenTelemetry to improve system observability and performance monitoring
- Delivered real-time and periodic reports to the executive board and company-wide stakeholders, covering subscriber trends, product engagement, and churn metrics
- Developed and automated financial and operational dashboards, including revenue, aging debt, and business performance KPIs

Tech stack: SQL Server, MySQL, PostgreSQL, MongoDB, ClickHouse, Elasticsearch, Data Pipelines, CDC, Docker, Lakehouse Architecture (Hadoop, Spark, Hudi, Presto), Kafka, RabbitMQ, Event-Driven Architecture, OpenTelemetry, Distributed Tracing

MISA JSC | Principal Solution Architect / Database Expert | 2020 - 2023

- Designed and developed a high-performance e-invoicing system capable of processing over 1 million invoices daily, leveraging C4 model, .NET Core, Kafka, MySQL, and MongoDB
- Led the architecture and development of a comprehensive ERP system serving 100,000+ enterprise clients, including complex modules such as Accounting, HRM, CRM, and Business Process Management
- Diagnosed and resolved critical performance issues across multiple enterprise applications, resulting in increased system stability and performance improvements ranging from 5x to 100x
- Actively contributed to drafting and standardizing company-wide procedures, design guidelines, and operational regulations for database architecture, implementation, and administration

Tech stack: .NET Core, Kafka, SQL Server, MongoDB, MySQL, Redis, Elasticsearch, Docker, Kubernetes

MISA JSC | Project Manager / Tech Lead | 2018 - 2021

- Managed and led a cross-functional team of 50+ members (Developers, Business Analysts, Software Architects, and QA Engineers) to deliver the company's flagship CRM system
- Developed a scalable CRM platform serving millions of enterprise customers, supporting the daily operations of over 2,000 sales staff and executive management
- Directed complex data migration from legacy system to new platform, successfully migrating 2+ million records while ensuring data accuracy and zero business disruption

- Delivered a mission-critical solution that centralized customer data, streamlined sales workflows, and enabled real-time reporting for strategic decision-making

Tech stack: .NET Core, Kafka, SQL Server, Redis, Elasticsearch, Angular, Docker, Kubernetes

FPT Software | Software Developer | 2012 - 2017

- Developed enterprise applications for major Japanese utility companies serving 65,000+ organizations
- Built an Outlook add-in and designed a relational database to manage complex contact data
- Developed Email Management System with role-based access control, Exchange Server integration, and custom filtering logic
- Collaborated with Japanese clients to deliver software specifications and system designs

Tech stack: C#, .NET Framework, SQL Server, Windows Forms, WPF, Exchange Server, Web Forms

OPEN SOURCE CONTRIBUTIONS

Dapper.Contrib.Bulk | github.com/nghiand1010/Dapper.Contrib.Bulk

High-performance library for SQL Server Bulk operations in .NET

Rendezvous Hashing | github.com/nghiand1010/rendezvous-hashing

Implementation of Highest Random Weight (HRW) hashing algorithm for distributed systems

TECHNICAL SKILLS

Programming Languages: C#, Python, Java, SQL, JavaScript

Architecture & Design: Microservices, Event-Driven Architecture (EDA), System Design (C4 Model), API Gateway, Multi-tenancy, Master Data Management (MDM)

Data Engineering: Data Lakehouse (Hadoop, Spark, Hudi, Presto), ETL Pipelines, CDC, ClickHouse

Databases: SQL Server (Performance Tuning Expert), PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

DevOps & Monitoring: Docker, Kubernetes, Kafka, RabbitMQ, Airflow, Prometheus, Grafana, Jenkins, OpenTelemetry, Distributed Tracing

LEADERSHIP & SOFT SKILLS

- Team Leadership: Successfully managed cross-functional teams of 50+ members across multiple product lines
- Strategic Planning: Proven track record in roadmap planning and execution for enterprise-scale systems
- Stakeholder Management: Expert in aligning technical solutions with business objectives for C-level executives
- Mentorship: Actively mentoring junior developers and architects in system design and data engineering
- Problem Solving: Strong analytical skills with a mathematician’s approach to complex technical challenges

CERTIFICATIONS

- **MLExpert (Machine Learning)** – AlgoExpert – 2024
- **SystemsExpert (System Design)** – AlgoExpert – 2023
- **Next-Gen CTO Program** – 2023
- **Fundamentals of Engineering Certification** – IPA Japan – 2013

HONORS & AWARDS

- **Editor’s Choice – Viblo** (January 2023) – Awarded for outstanding technical contributions to the developer community

Building scalable systems with a mathematician’s mindset.
